SWAPNIL SINHA

SOUND DESIGNER | AUDIO ENGINEER

ABOUT

CLICK- [PORTFOLIO](#)

With 6 years of dedicated chaos-wrangling in the digital audio universe, I've become the kind of audio engineer who speaks fluent Reaper and Ableton Live without breaking a sweat. I dive deep into sound design principles—crafting sonic textures, atmospheres, and the occasional “how did you even make that?” moment for everything from cinematic worlds and game audio to experimental electronic adventures.

I'm a professional story-drifter armed with an H1e, too many plugins, and an ever-growing arsenal of field recordings I swear I'll use someday. I design and implement sound for games, films, promos, and basically anything that lets me escape reality for a while. From guiding VO artists to building SFX pipelines, from mixing for labels to crafting immersive game audio in Unity and FMOD, I shape, bend, twist, and emotionally charge sound until it becomes a whole universe of its own.

If it makes noise, I can turn it into an experience. And if it doesn't make noise... I'll probably still record it.

WORK EXPERIENCE

- **BattleBucks** FEBRUARY 2026 - PRESENT
Sound Designer
 - Currently designing & composing for all **hyper-casual games** on the company launcher, ensuring engaging and polished audio experiences
 - Collaborated closely with developers to achieve precise and efficient **audio implementation** within Unity
- **Jabsz Studios** APRIL 2025 - JULY 2026
Sound Designer
 - Directed the complete audio vision for a **Horror-Adventure PC Title** called **Rahasya**, designing, composing, and implementing all in-game audio, including SFX, ambience, UI, dialogue, gameplay feedback, and the original soundtrack.
 - Implemented and optimised interactive audio in Unity using FMOD and Reaper, collaborating closely with developers to deliver an immersive player experience.
 - Worked as a Sound Designer & Music Composer on **two mobile games**, creating and implementing high-quality audio assets across multiple projects.
 - Developed standardised **audio pipelines**, managed audio assets with **Git**, and created professional SFX libraries for game developers, filmmakers, and sound designers.
- **Pocket Fm** APRIL 2025 - MARCH 2026
Consultant Sound Engineer
 - Worked on 30+ Promo Ads as a **Sound Engineer**.
 - **Directed voice-over artists** for tone, pacing, and delivery to match creative intent.
 - Cleaned, mixed, and mastered BGM, SFX & VO for META Platforms
 - Oversaw end-to-end **audio quality control** across the production pipeline, ensuring consistency and high standards throughout
- **Freelance Audio Engineer** AUGUST 2023 - APRIL 2025
Mixing & Mastering
 - Mixed & Mastered songs for Z - TRAKZS MUSIC Label and various Independent artists.
