ABOUT ME

With 6 years of dedicated chaos-wrangling in the digital audio universe, I've become the kind of audio engineer who speaks fluent Reaper and Ableton Live without breaking a sweat. I dive deep into sound design principles—crafting sonic textures, atmospheres, and the occasional “how did you even make that?” moment for everything from cinematic worlds and game audio to experimental electronic adventures. I'm a professional story-drifter armed with an H1e, too many plugins, and an ever-growing arsenal of field recordings I swear I'll use someday. I design and implement sound for games, films, promos, and basically anything that lets me escape reality for a while. From guiding VO artists to building SFX pipelines, from mixing for labels to crafting immersive game audio in Unity and FMOD, I shape, bend, twist, and emotionally charge sound until it becomes a whole universe of its own.

EDUCATION

Ajeenkya DY Patil University, Pune

BSc – Sound Engineering

AUG 2022 – AUG 2025

DPS Indirapuram, Indirapuram

12th CBSE

2022

WORK EXPERIENCE

BattleBucks – Sound Designer

Feb 2026– Present

- Design and compose original music and sound effects for the full slate of hyper-casual games released on the company's launcher, tailoring each game's audio identity to its specific mechanics, pacing, and tone.
- Create UI sounds, feedback cues, and ambient/loop-based music tracks optimized for short play sessions and high replayability, typical of the hyper-casual genre.
- Implement and integrate audio assets directly within Unity, working with adaptive/interactive sound systems to sync audio tightly with gameplay events.
- Collaborate closely with the development team throughout production to ensure audio is implemented precisely and efficiently, minimizing rework and maintaining consistent quality across multiple simultaneous game titles.
- Ensure a polished, cohesive audio experience across the entire game launcher portfolio, contributing to player engagement and retention

Jabsz Studios – Sound Designer

APRIL 2025 – JULY 2026

- Directed the complete audio vision for Rahasya, a horror-adventure PC title – designing, composing, and implementing all in-game audio, including SFX, ambience, UI, dialogue, gameplay feedback, and the original soundtrack.
- Implemented and optimized interactive audio in Unity using FMOD and Reaper, collaborating closely with developers to deliver an immersive player experience.
- Worked as Sound Designer & Music Composer on two mobile games, creating and implementing high-quality audio assets across multiple projects.
- Developed standardized audio pipelines, managed audio assets with Git, and created professional SFX libraries for game developers, filmmakers, and sound designers.

Pocket Fm – Consultant Sound Engineer

APRIL 2025 – MARCH 2026

- Delivered audio engineering support on 30+ promotional ad campaigns, handling sound from initial creative brief through final delivery.
- Directed voice-over artists during recording sessions, guiding tone, pacing, and delivery to ensure performances aligned precisely with each campaign's creative intent.
- Cleaned, mixed, and mastered background music, sound effects, and voice-over tracks for content distributed on Meta platforms, ensuring broadcast-ready audio quality.
- Oversaw end-to-end audio quality control across the full production pipeline – from raw recordings to final mix – maintaining consistency and high technical standards across every deliverable.
- Worked as a dependable audio partner in a fast-turnaround promo environment, balancing volume (30+ ads) with consistent quality across each piece.

Freelance Audio Engineer – Mixing & Mastering

AUG 2023 – APRIL 2025

Mixed & Mastered songs for Z - TRAKZS MUSIC Label and various Independent artists

SKILLS
